

Topic: Fantasy Basketball in BSN(Baloncesto Superior Nacional)

Author: Axel J. Perez Rodriguez

Date1/28/2022

*Problem Background*

- a. There is no application that allows fans of the Baloncesto Superior Nacional (BSN) to compete in a tournament by choosing their favorite players like they do in the National Basketball Association (NBA).
- b. People are not interested in knowing the different players in the league and their statistics.
- c. There are applications for the NBA which use this format and have given positive results because people know more about the players of the different teams.

*Target*

- a. Motivate people to learn more about sports in Puerto Rico and our athletes.
- b. Promote more detailed statistics of the different players.
- c. Compete with the different leagues from the rest of the world.

*Causes*

- a. There are not many applications that promote sports in Puerto Rico.
- b. People don't know most of the players and teams in the league.
- c. People are more interested in competing in NBA fantasy apps.

*Countermeasures*

- a. Create an application or a web page that allows you to create a team with the different players from the league and from different teams.
- b. The application will allow you to create a team and select players.
- c. Depending on the statistics that these players obtain in real life, they will be added to the team obtaining points. In the end, the team with the most points will be the winner.

*Check/Evaluate*

- a. People get interested as it is a friendly competition between close friends or strangers.
- b. We can assess whether the application results by looking at the number of people who follow these players on social networks or the number of people who attend the courts at each game.

*Act/Standardize*

- a. Continue promoting the sport at the local level.
- b. Accessibility of people to get to know their players in more detail.
